Winter Weather Pet Safety Tips

🧂 Protect paws from salt and ice melt

Road salt can irritate paws and be harmful if licked.

🥶 Limit exposure during extreme cold

Some pets are especially vulnerable to frostbite and hypothermia.

🚗 Check vehicles before driving

Outdoor cats may seek warmth near engines or wheel wells.

💧 Ensure access to fresh water

Pets can become dehydrated in winter too.

🧥 Consider cold-weather gear

Some pets benefit from jackets or booties.

🏠 Provide warm shelter

Outdoor pets should always have insulated protection from the elements.

🚶 Maintain visibility

Reflective gear can help keep pets safe during darker winter days.
